vNOTES
The Next Evolution in Minimally Invasive Gynecologic Surgery
WHAT IS vNOTES?

vNOTES (vaginal natural orifice transluminal endoscopic surgery) is an advanced minimally invasive procedure that combines the benefits of laparoscopic and vaginal approaches to gynecologic surgery.

Compared to laparoscopic surgery, vNOTES offers patients a faster recovery, less pain and no visible incisions.²

The GelPOINT® V-Path transvaginal access platform enables better access to and visualization of the uterus, fallopian tubes and ovaries compared to traditional vaginal surgery.¹
vNOTES solves the challenges of vaginal surgery by allowing additional visualization. It enables you to see the patient’s anatomy, as well as any scar tissue or adhesions. Also, as surgeons, we find it helps us teach our residents how to perform surgery correctly and safely.”

Erica Stockwell, DO, MBA, FACOG, MIGS Surgeon

There’s laparoscopic assisted, there’s robotic, there’s vaginal, and then vNOTES. If I ever needed to get a hysterectomy, believe me, it’s going to be vNOTES. I mean, there’s just no comparison!”

Crystal Chapman, RN, BSN, CAPA, PACU Nurse
PATIENT BENEFITS
Compared to the laparoscopic approach, vNOTES has been shown to provide the following benefits to patients:

- **Shorter Hospital Stay**
- **No Visible Scars**
- **Less Postoperative Pain**
- **Faster Recovery Time**

"The vNOTES procedure and my surgeon made it possible for me to just have a little blip on life and just keep going, and I feel so much better after the procedure!"

*Melissa, vNOTES Patient*

HOW CAN I ADVANCE MY PRACTICE WITH vNOTES?

vNOTES courses provide a comprehensive understanding of vNOTES procedural steps and instrumentation used in the treatment of benign gynecologic pathologies. The course includes the following:

- Didactic lectures reviewing indications, clinical literature, anatomy and instrument placement
- Hands-on practicum with lifelike Simsei® tissue models to simulate vNOTES
- Expert guidance and feedback from the vNOTES faculty members
- Continued education and support after course completion
